## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 2, 4 - 8 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 4,942,880 to Slovak.

In reference to claims 1, 2, 4 - 8 and 10, Slovak discloses applicant's claimed invention including data acquisition circuitry consisting of a first contact and a second contact to generate voltage data and a first connection connected at a first end to the first contact and a second connection connected at a first end to a second contact; and a portable data processing unit connected to a second end of the first connection and to a second end of the second connection to process the voltage data and body impedance data to produce current flow data. The data processing unit includes data conditioning circuitry to condition a data signal from the first and second contact, data input and output interface circuitry, and a visual display connected to the data output circuitry, and a central processing unit and a memory storing a set of executable programs. The apparatus also has a battery. See Column 2, line 31 – Column, 4, line 14.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary

Art Unit: 3736

skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 9 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 4,942,880 to Slovak as applied to claims 7 and 10 above, and further in view of U.S. Patent No. 6,393,317 to Fukuda et al.

In reference to claims 9 and 15, Slovak discloses data output interface circuitry, but fails to disclose connecting a compact removable flash memory card to the circuitry for storage. However, Fukuda et al. teaches an apparatus for measuring current flow through a living body (Figure 1) in which a compact removable flash memory card (51) is connected to the data output interface circuitry (Col. 4, lines 24 – 28). One skilled in the art at the time the invention was made would have been motivated to modify the data output interface circuitry as discloses by Slovak to include the removable flash memory card as taught by Fukuda et al. in order to store the results of the test so that it could be readily accessed at a later time.

### *Response to Arguments*

2. Applicant's arguments filed 1/23/03 have been considered but are moot in view of the new ground(s) of rejection.

### *Allowable Subject Matter*

4. Claim 17 – 19 are allowed.

5. Claims 3, 11 – 14 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3736

*Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patent Application Publication 2003/0004432 to Assenheimer.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
